

MOHAMMED TAYIBULLA

Software Engineer | Full Stack Developer | 3+ Years Experience | Immediate Joiner

+91-8550895486 | contact2tayib@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Profile

Software Engineer with 3+ years of experience developing scalable SaaS platforms and API-driven applications using Node.js, NestJS, and Python/Django, with frontend experience in React.js and Next.js. Experienced in designing RESTful APIs, implementing business logic, and optimizing PostgreSQL queries for high-performance systems.

Skilled in developing cloud-native applications using Docker and Google Cloud (GCP), and integrating AI-driven workflows for real-world SaaS use cases.

Built and maintained production-grade systems, including booking platforms, AI-powered tools, and real-time data applications, focusing on performance, reliability, and scalability.

Skills

Backend: Node.js, NestJS, Python, Django Rest Framework, Express.js, REST APIs, WebSocket

Databases: PostgreSQL, MongoDB, MySQL

Frontend: React.js, Next.js, JavaScript, TypeScript, Redux, Context API, TanStack Query, Tailwind CSS

DevOps / Cloud: Docker, DigitalOcean, GCP, CI/CD, Jenkins, Github Actions, Terraform, GitHub, Bitbucket

Professional Experience

In Cresco Technologies

Bengaluru, India

Software Developer 1

Dec 2025 – Apr 2026

- Designed and implemented REST APIs and backend features for an Expert Quote SaaS platform, enabling expert onboarding, moderation, and publishing.
- Developed editorial dashboards to support expert onboarding and quote review processes, improving efficiency and enabling teams to manage large datasets from a centralized platform.
- Integrated Salesforce CRM with the booking platform, automating booking data and customer record synchronization, reducing manual effort for teams and improving operational efficiency.
- Handled production support and issue resolution, ensuring stable booking and payment flows while maintaining platform reliability.
- Improved application performance by optimizing API responses and frontend rendering, reducing page load times by 35% and achieving 95+ Lighthouse scores.

IndusVision Technologies

Bengaluru, India

Software Engineer

Jan 2023 – Oct 2025

- Built full-stack web applications using React.js and Node.js, ensuring accessibility and achieving 95+ Lighthouse scores.
- Built and deployed a full-stack travel booking platform with PhonePe payment integration, handling booking workflows and improving user experience.
- Developed data-driven applications for fintech, AI, and surveillance systems, integrating frontend interfaces with backend APIs to improve performance.
- Implemented real-time features using WebSocket and REST APIs, achieving a 40% reduction in latency and improved system responsiveness.
- Improved application performance by optimizing API efficiency and frontend rendering, reducing load times by 35% and enhancing maintainability.

Projects

Defect Detection System (AI Vision UI) | *React.js, Redux.js, TypeScript, Recharts, REST APIs*

- Developed a real-time defect detection platform, integrating camera input with AI/ML inference APIs.
- Implemented features for live product scanning, defect overlays, confidence scoring, and image review using high-performance components.
- Optimized performance for high-frequency camera frames, reducing lag, improving operator response time, and reducing manual QA effort by 60%

Expert Quote Platform (AI SaaS) | *Python, PostgreSQL, Docker, Google Cloud Run, Vue.js ,Nuxt.js*

- Developed features for a cloud-native Expert Quote platform enabling creation, moderation, and distribution of expert insights across industries.
- Integrated **Gemini AI** models to enable automated quote generation, semantic classification, and multilingual content support.
- Built high-performance dashboards using Vue.js/Nuxt.js, supporting searchable quote repositories and editorial workflows.
- Deployed containerized services using Docker and GCP Cloud Run, enabling scalable deployments and optimized PostgreSQL queries, improving API response times by 30%.

Hotel Booking System | *Next.js 14, TypeScript, TailwindCSS, Stripe, Salesforce*

- Developed a production-grade booking system using Next.js 14 with SSR, enabling scalable and SEO-friendly booking workflows.
- Implemented real-time availability and booking features integrated with Salesforce, ensuring synchronization of booking and customer data.
- Implemented Stripe payment integration and pricing logic, enabling secure checkout and automated booking confirmation.
- Handled production support and debugging of booking flows, payment issues, and Salesforce integration edge cases.

AI Annotation Tool | *React, Vite, TS, Zod, TanStack Query*

- Developed features for uploading, editing, annotating, and reviewing datasets with real-time autosave and high-performance canvas tools.
- Built annotation and dataset management features, including versioning, training/testing dashboards, and automated reporting.

Awards and Recognitions

Star Employee of the Year

IndusVision Technologies

Valuable Team Member

Homeal (Ekfrazo)Technologies

Education

Adarsha Polytechnic

Aug 2018 – Apr 2022

Diploma in Computer Science, CGPA: 7.8 (74%)

Bengaluru, India

HSIS English School (SSLC)

Mar 2018

Karnataka State Board, 88.8%
